Advantages & Disadvantages

Where Did We Come From ?

red flare
GOVERNANCE RISK COMPLIANCE

As With All CU's Where Did We Come From?

- **Risk Registers in Excel with multiple versions saved**
- **Excessively Large Risk Register, difficult to maintain**
- **Lever Arch Folder For Policies – Version Control an Issue!!**
- **Staff Attestation on Policies not captured**
- **No Integrated Compliance Universe**
- **Difficult Risk & Compliance Reporting Framework due to Excel**
- **Agendas rarely changed**
- **Minutes both manually kept and typed in Word**
- **Committee minutes not consistent in quality**
- **Board Packs Printed and Hand Delivered**
- **Internal Controls Documented within Policies**
- **Internal Audit Recommendations not centrally maintained**
- **Visibility of overall Governance Risk and Compliance an issue**

Post Red Flare - Where Are We Now?

- Fully integrated Risk Registers – No more Excel and versions
- One Main Risk Register (25 risks) and 4 sub risk registers
- Policies Management fully automated with digital version control
- Staff Attestation on Policies digitally captured
- Fully Integrated Compliance Universe, with separate compliance registers
- Risk & Compliance Reporting at the touch of a button
- Agendas updated regularly within Governance Module
- All Minutes captured digitally with electronic approval
- All Minutes and Agendas consistent in quality
- Board Packs uploaded and maintained in Red Flare
- Internal Controls Documented within Red Flare
- Internal Audit Recommendations maintained Red Flare
- Directors Dashboard gives visibility of overall Governance Risk and Compliance in real time

Onboarding & Deployment

ONBOARDING

SUCCESS

red flare
GOVERNANCE RISK COMPLIANCE

Decision, Onboarding & Embedding

- **Procurement – Demo'd 3 provides and made our selection**
- **Licence Agreement Signed**
- **Instance of Red Flare was created within 3 – 4 days**
- **Onboarding Plan issued by Customer Support**
 - **1st Item Required Was Organisation Chart and Email Addresses**
 - **2nd Item Risk Register**
 - **3rd Item Policies**
 - **4th Item Minutes, etc, etc..**
- **Customer Support Populated Red Flare, set up user dashboards, imported Risk Register & Configured System based on our needs**
- **Training – In-person and Online. Also recorded videos useful**
- **Started With using Risk, then policies, next meetings, etc, etc**
- **Account Manager Allocated and available for online meetings**
- **3 – 6 months Onboarding**
- **12 months fully embedded**

GOVERNANCE RISK COMPLIANCE

Risk Management Benefits

- **No more version control in Excel**
- **Adopted Standalone Risk Registers**
- **Management Team have direct access to allocated risks**
- **Directors have access and oversight on “View Only Basis”**
- **Reporting is extensive and has filters for comparisons purposes**
- **My Risk Tile allows individual risk ownership**
- **Risk Appetite and Capacity fully integrated**
- **Internal Controls aligned to Risks**
- **Risk Reports uploaded to Risk Library**
- **Directly aligned with CBI expectations**
- **De-risks Outsourced Risk Management Function if we had to bring in-house**

Compliance Dashboards Are Easy to Understand & Configure

The graphic features a dark blue background with a large, faint lightbulb containing a brain illustration at the top center. Below the lightbulb, the text "Meeting Management" is written in a large, orange, sans-serif font. The background is decorated with various icons: gears, a calendar, a credit card, a speech bubble, a cloud, a clock, a document, a bar chart, a dollar sign, and a group of people. At the bottom, there is an illustration of a meeting in progress. On the left, three people are seated at a table, with one person gesturing. On the right, a group of people is seated at a long table, with one person holding a document. The overall design is modern and professional, with a color palette of dark blues, oranges, and greys.

Meeting Management

red flare
GOVERNANCE RISK COMPLIANCE

Meeting Management Benefits

- **Digital Version of all Agenda Templates**
- **Meeting Notifications Automated**
- **Meeting Management to record discussion, challenge, votes**
- **Supporting Documents attached to agenda point**
- **Board Pack Management**
- **Minutes can be produced, and meetings closed**
- **Committee Attendance Recorded and Reportable**
- **Directors have access and oversight on “View Only Basis”**
- **Detailed Reporting with filters and export**
- **Committee Tile Always Shows Current Status – Red, Amber, Green**
- **Notifications can be enabled by email**
- **Board Packs can be downloaded**
- **Specific rules can be applied, re Quorums or Meeting Terms**

Committee Dashboards Are Easy to Understand & Configure

The screenshot displays the 'red flare' Committee Dashboard. At the top left is the 'red flare' logo. A dropdown menu is set to 'Committee Dashboard'. The dashboard is organized into a 2x3 grid of colored boxes, each representing a committee. Each box has a title bar with a small gear icon for configuration.

Committee Name	Last Met
Board of Directors	Last met on 2023-10-19 (more than 6 weeks ago)
Finance Committee	Last met on 2023-10-24
Nominations Committee	Last met on 2023-11-22
ARC Committee	Last met on 2023-10-11
Remuneration Committee	Has never met
IT Committee	Last met on 2023-10-25 (within past 4 weeks)

My Dashboard

red flare
GOVERNANCE RISK COMPLIANCE

Staff Dashboards - Personalised to Their Needs

- When deploying Red Flare within our staff i.e. operations team, we only gave them access to tiles specific to their needs.
- These tiles are personalised to Risks, Tasks, Controls allocated to them.
- They simply click on a tile, complete the task and close it.

Future Plans For Red Flare

red flare
GOVERNANCE RISK COMPLIANCE

Our Future Plans For Red Flare GRC

- **Software Register** – Transfer from Excel to Red Flares integrated register
- **Operational Resilience** – Create Operational Resilience Dashboard (DORA 2025)
- **Key Risk Indicators** – Track and align KRI's with risks
- **Training Repository** – annually training calendar, training repository and training records
- **Fitness and Probity** – Document directors F&P assessments
- **Regulator Dashboard** – Design a Regulatory Dashboard for CBI login
- **Risk & Compliance Incident Log** – Staff to Use Mobile Phones to record risk events
- **Decision Register** – Record or roll forward decisions
- **Integration** – Integrate Red Flare with Progress Banking for Real Time Reporting

Advantages & Disadvantages

red flare
GOVERNANCE RISK COMPLIANCE

Excel & Word

- ▶ Deploying Red Flare GRC offers several benefits over relying on Excel spreadsheets and Word documents for managing GRC processes.
- ▶ **Weaknesses of Excel spreadsheets and Word documents**
 - **Manual data entry and updates:** GRC data is manually entered and updated in spreadsheets and documents, which is time-consuming and prone to errors.
 - **Limited data integration:** Spreadsheets and documents lack built-in integration with other enterprise systems, making it difficult to share and consolidate data.
 - **Poor visibility and reporting:** Spreadsheets and documents are not designed for comprehensive reporting and analysis, making it challenging to gain insights into GRC risks and trends.
 - **Increased risk of non-compliance:** Manual processes and limited visibility increase the risk of non-compliance with regulations and standards.

Advantages Using Red Flare

- **Automated data collection and updates:** Red Flare automatically collects and updates data from various sources, reducing manual effort and improving data accuracy.
- **Centralized data repository:** Red Flare provides a centralized repository for storing and managing all GRC-related data, ensuring data consistency and accessibility.
- **Robust reporting and analytics:** Red Flare offers advanced reporting and analytics capabilities, enabling users to visualize GRC risks, trends, and performance metrics.
- **Improved compliance management:** Red Flare streamlines compliance workflows, automates risk assessments, and tracks compliance obligations, reducing the risk of non-compliance.
- **Enhanced collaboration:** Red Flare facilitates collaboration among different departments and teams involved in GRC processes.
- **Scalability:** Red Flare can scale to meet the growing needs of organizations as their GRC requirements evolve.
- **Reduced costs:** Red Flare can help organizations save costs by improving efficiency, reducing compliance risks, and mitigating losses from non-compliance.

red flare
GOVERNANCE RISK COMPLIANCE

Disadvantages

- **Cost:** SaaS Model i.e. annual licence fee. For Donore CU we feel the benefit far outweighs the cost, but for some CLG's cost will be an issue.
- **Onboarding:** Took longer than expected, but this was down to us. Trying to allocate time for a new system can be difficult. In hindsight we should have allocated the time appropriately.
- **Training:** You sometimes forget what you learn, if you don't start using the system immediately. The New Training Videos Tile is a great solution within the system.
- **Embedding:** It will take time to embed so have a plan to embed fully one module before starting on the next module.
- **Overwhelming / Daunting:** If you don't use the system on a regular basis, it can seem overwhelming and you might revert to Excel or Word. My advice is to simplify your dashboard and use their Customer Services, as you are paying for their support.
- **It's a Tool:** Red Flare is just like any other piece of software, it's only as good as the information you put in. Red Flare is an excellent tool if kept up to date, so be prepared to give it your time.
